Chicago & St. Louis

July 5, 6, 7, 1919

Left Iowa City at 1 am.

Reached Chicago, got  
tickets for St. Louis on  
the Wabash, and then went  
out to C. H. S.

Found that there was no  
meeting! I received no  
notice, but Smetanka  
said that he wrote me  
Tuesday, saying there was  
no meeting.

Wrote article for C. S.

Review & some letters.

Went down town at 6 PM

at 10 went to bed &

at 10<sup>40</sup> train left for  
St. Louis

July 6, Saturday

Reached St. Louis a little before 8 am. No one met me & I waited until 10 & then went to

A. J. Cyka

3474 Grand Ave. St. Louis

(Take Compliment or Parking from Depot, and change to Grand Ave. car south. (Go south))

In afternoon rode about with Mr. Cyka & Mr. King (in whose auto we rode).

At 8 pm we went to the Hotel Barden and I spoke for over an hour on "Jamboree".

My letter was stamped 2 PM Saturday, (though mailed at 11:50 am Friday) & delivered late in forenoon. Hence Mr. Wimer

Didn't know how  
or when I was to come.  
The crowd was probably  
400, Holman, <sup>Baloun</sup> etc.  
Anton Besons' has  
~~son~~ who wishes to go  
to school. Advised him  
to take 1 or 2 yrs. of  
L.A. work first, then  
professional work. E.E. &  
the like.

We left a little  
after midnight, and  
went to Cajal's and  
to bed.

July 7, 1919.  
Slept at Cajal's.  
Spent part of forenoon  
at home, then went to  
Károlyi's fin where Mr. Reber  
holds out, & thence to  
the St. Louis City, where  
I met Mr. Novak, and  
then called on Martin  
Marick, a leader of  
the Slovak people who  
was very sore over the declaration  
of Wiener that "Slovakia was  
made a dirty article."  
Mr. Slovaks came to  
the meeting, & he declared  
that they would never go  
there. There seems to be  
considerable feeling over  
this matter among the  
Slovaks, as well as some of our  
own people.

Martin Mareček

1845 So. 11<sup>th</sup>

St. Louis, Mo.  
Slovak, Vidce.

The Mr. Kriz with whom I  
saw yesterday, & who came  
again today to take me  
to station is

Václav Kriz

1926 So. 13<sup>th</sup> St.

He is an inventor, & gave  
me one of his "alarm door-  
knobs."

Cyba relates the Snajdr  
organ incident again.  
Snajdr had been given  
the contract (by Wotisch)  
for the organ, just before  
giving up his place, although

Snajdr was the highest  
bidder. Cyba called  
for new bids, and North  
of Milwaukee got it.  
(Wotisch had asked Snajdr  
to come down, & he reduced  
bid \$10,00. No other bidder  
was given much a chance.)  
Snajdr continued to send  
organ in bundles to  
lodges for 6 months.

Then 2<sup>nd</sup> class votes were  
denied him & after decision  
in court he has to pay  
1 ct. per copy postage (back)  
for the 6 mos.

Finally the N.H.R. Wodora  
voluntarily gave him  
\$1500.00.

In afternoon Mr. Marick  
drove us out north to  
Baden Park. Go to this  
again. Shows woods  
and banks.

Beyond it, N., are the  
Cement works & then  
The "Chain of Rocks"  
At cement works are  
claybanks, & also back  
means Baden Park.

There seems to be a  
very large reddish  
stuff,

went to new water  
works. Fine, - with  
big open reservoir.

To reach this part  
take a Broadway  
car out to end, then  
walk, or take

Water works Railway  
car. You can also  
get to Calvary cemetery  
on Bellefontaine car  
& go through cemetery E.,  
to Broadway.

We got back, had  
supper, & then had to  
hurry for station.

Just made it by the  
skin of the teeth!  
The C&O. crosses the  
river at Ft. Bellefontaine.  
Train stops there. (See  
tables.)

Looks good. There is a  
big quarry or excavation  
on the E. side, where  
exposures look fine. This  
is off the R.R.

July 8-

Awakened at  
Wahpeto, with  
train on time!  
Train at West Liberty

McGregor, etc. July 26 1919

Left Iowa City at 12:15 PM  
It is very hot (101°) and  
dry, with SW wind.

Everything is beginning to  
look parched, cornleaves  
rolled up, & in places

lower ones are burned

*Asclepias syriaca*, *Helianthus*  
*grossus*, *Sorbus*

*Aporosa* (green) *Cirsium*

discolor, *Eriogonum canadense*

show tendency to fold

leaves, and droop.

Those on *Asclepias*, *Eriogonum canadense*  
~~etc.~~ turn upward &

fold longitudinally

*Plum glabra* leaflets

turn down.

Blue grass in dry &

yellow. *Ambrosia trifida*  
& Hemp wilted, also *Monarda*  
*mollis*. Much of the clover  
is dead & dark brown.

*Cassia chamaecrista* leaflets  
fold upward, also *Lepidoglossis*  
*capitata*.

Attended Ant. Soukup's  
funeral & left at 4:50 PM  
for Postville.

Everywhere signs of drought.

Along RR just before  
reaching Independence

saw much small

*Liatris pycnostachya*, & other

prairie plants.

Beyond Independence, prairie  
along RR quite flat a little  
ways out.

West Union

Mr. W. V. Knolly.

Ackley, Ia

will be there during  
September

Sunday July 27, 1919

We reached McEwen at  
12<sup>30</sup> AM. being carried over to  
McEwen from No. McEwen  
by Mr.

We put up at the  
Zimmerman Hotel.

Awoke at 8<sup>30</sup> am.

In the forenoon we visited  
about the hotel, and then we  
took an auto trip to the highlands,  
Pike's Peak, the Clayton Outlook, etc.  
The trip to Pike's Peak was  
especially interesting. We passed  
through fine upland forest,  
white oak, Red Oak, Hard Maple,  
Black Walnut, etc.

At Pike's Peak there is a  
prairie opening, now heavily  
trampled, but still showing  
prairie character very well.

The following were noted:

At McGraw (July 27) 1919

PA. - Picher Peak

*Lepachys pinnatis* fl  
*Aster* <sup>laevis</sup> ~~anther~~ bud  
*Petalostemum purpureum* fl.  
*Monarda mollis* fl.  
*Leptis canina* br

*Olyma canadensis* fr  
*Rosa pratincola* fr  
*Ceanothus americanus* lf  
*Solidago rigida* br  
*Andropogon furcatus* lf  
*Vitis rotundifolia* lf  
*Hazel* lf  
*Helianthus scaberrimus* lf/fl  
*Helianthus major* lf/bud  
*Aster multiflorus* bud  
*Composita umbellata* lf  
*Amorpha canescens* fr  
*Saxifraga hirsuta* lf

*Solidago nemoralis* bud  
*Bontelma confertifolia* fl  
*Perideris stellata* fr  
*Rhus glabra* lf  
*Pycnanthemum flexuosum* fl  
*Artemisia canadensis* bud  
*Koeleria cristata* fr  
*Oenothera biennis* bud  
*Aster cylindricus* fr  
*Poa compressa* fr  
*Scutellaria perfoliata* fr  
*Potentilla arguta* fr  
*Andropogon scoparius* lf  
*Lespedeza capitata* bud  
*Cirsium arvense* bud  
*Anemone patens* <sup>recept</sup> ~~recept~~  
~~I saw the last group here~~  
 Among trees & shrubs on the  
 bluffs: *Quercus muhlenbergii*, *Pinus virginiana*,  
*Amelanchier (rotundifolia)*, *Phytocarpus*,  
*Betula alba* var

In the afternoon we  
were on the Heights in  
the Clark cottage where

we were royally entertained,  
attended by Mary Kay.

In the evening I gave  
my address on "Conservation  
as an Ethical Force," to an  
appreciative audience in  
the Methodist Church.

At the cottage, "the Faculty  
House," were Kay, Keyes,  
Stephens, & myself, & on the  
following day, Pamela  
was added. Bennett & others,  
also came in occasionally.

We are the guests of  
The Messager, <sup>Heights</sup> Outing Assn.

Sat about the hotel  
until midnight.

During the day was with

(Including Tuesday)

Senator Perry, Holdrege of Rockwell

" Harchem of Dubuque

" <sup>+ Mrs.</sup> Newberry of Franklyn

With each I wanted to take an  
outing, also Mr. <sup>+ Mrs.</sup> Bixby of Edgewood.

Also met Judge Durham,  
Mr. Harlan, Mr. Kelso, Mr. Crosby  
of Garnaville (old gentleman), Mr. Hall  
of Decorah; C. F. Neill of Esau, etc.  
Of the local people, Miss  
Clark, Mr. Bell, etc., Mr. Bickel

Mrs. & Capt. (or) Taylor of Sioux City  
Mrs. Taylor of Bloomfield (O.T.S.)  
Mrs. McVicker of Mason City.

Mrs. & Mrs. Severn.

Mrs. Hattie Parker Hines<sup>(1)</sup>

Miss Sherman (now McEggar) & lady, birds.

" Sheldon, Davenport, Ia.

Monday, July 28, 1919

Left for Chicago at 12<sup>21</sup> AM  
(sleepers) & went to C.N.S.  
headquarters. Our meeting  
was late, but we crowded  
it. (See notes)

Left at 6:05 PM. on  
Chic & St. P. again.  
Travelled with a Salvation  
Army officer going to  
Sioux Falls.

Changed at Havana.  
Sat with young sailor from  
Everly, Ia., who was over seas.  
Reached McHenry at 2 AM.

Tuesday July 29

Went to Zimmerman Hotel & then  
after 10 went to Highly. Did and  
briefly the Wisconsin paper.

In afternoon I, Stephens, Kees  
& Kay gave talks. (That was order)

Appos to my statement that  
eastern landscape artists go wrong here,  
Miss Sheldon reports  
a case of interest.  
At the Villa Chantal, owned  
by Sister (Frank) at Rock Island  
(on hill), an eastern expert  
was called in, and he filled  
their grounds with Rhododendrons,  
which died the next year!

James Perry expressed approval  
for local committee for  
community.

We had well served at  
Dr. May Clark's cottage,  
which was the "Faculty  
House" and they were  
certainly good.

Altogether, the people here  
seemed to be very anxious  
to treat us right  
and they succeeded

fully. Miss Sherman at National  
Trip to Miss Sherman at National  
with Kees, Stephens, - to see birds,

We had a long ride after  
return from Mrs Sherman

In the evening I  
arranged slides, wrote  
notes, and we  
visited somewhat.

The folks here have  
had autos at our  
disposal, and have  
been very willing to do  
anything for us.

Mr. Carl Pickett  
(with the bright little  
blue-eyed wife, who is a  
sister of Dr. Mary Clark)  
was always at hand  
and surely did all  
that could be expected.  
Mr. Bennett also  
worked hard.

I slept in room this  
time but on porch the  
two following nights.

Wednesday, July 30, 1919

Towards Lookout

Walked over top of ridge in  
back woods. Observed following  
& collected these marked:

*Carpa ovata* ? lf

+ *Q. alba* lf

*Prunus pennsylvanica*

*Rubus allegh* gr. W.

+ *Populus grandidentata* lf

*Quercus rubra* lf

*Prunus virginiana* lf

*Crataegus mollis* lf

+ *Sorbus tremuloides* lf

+ *Opuntia* of *gules* lf

+ *Xanthoxylum* collected lf

+ *Celastrus*

+ *Rubus* - green fruit

*Hesperis matronalis*

+ *Rhus typhina* lf

*Lilium americanum*

+ *Scorpiocarpus* lf

+ *Fragaria*

+ *White* - lf

+ *Osmunda* - lf

+ *Rosa* — (3 sets the  
 yellow was most open - others  
 in bud)  
 In opening before coming to  
 Coolidge, there is fringe of  
 low white & clustered oak.

- + *Solidago canadensis* bud - border
- + *Scrophularia leporella* fr. prairie
- + *Hieracium scabrum* fl. "
- + *Rudbeckia hirta* fl. "
- + *Gypsophila*? fr. "
- + *Hieracium canadense* fl. border
- + *Hieracium bifidum* fr. prairie
- + *Leibodora caerulea* sp. & bud
- + *Helianthus rugosus*? fr. prairie
- + *Solidago nemoralis*? bud. "
- + *Achillea verticillata* fl. "
- + *Erigeron ramosus* fl. "
- + *Arnica montana* fr. "
- + *Euphorbia corollata* fl. "
- + *Petalostemum purpureum* fl. "
- + *Prunella angustifolia* " "
- + *Quercus coccinea* fr. "
- + *Saxifraga hypnoides* fl. "
- + *Thymus canadensis* fr. "

In the afternoon drove  
 to Pikes Peak -  
 Noted near Monmouth 10/18  
 lay - just above Rt.

~~Woods -~~  
~~Oxalis~~  
~~Red oak~~

- + ~~White oak~~
- Populus grandidentata*
- Pteris aquilina* (abundant)
- Hystrix* fl.
- Paeonias alba* fl.
- Agrostis stricta* fl.
- Vitis vulpina* fl. (common)
- (Took Red oak leaves & acorns)
- ~~*Prunella*~~
- ~~*Laurel*~~
- ~~*Birch* (white)~~
- Osage*
- Viburnum dentatum* fl.
- Corylus bullata* fl.
- Amelanchier* fl.
- Hepatica*
- Abies balsamea*

with land —  
 at foot of bluff:  
*Cirsium altissimum* br  
*Scrophularia maculata* fl  
*Hemiphragma* lf  
*Aster* lf  
*Celtis* lf

A rain storm came up.  
 We rode in canoe with  
 Capt. Freeman.  
 In evening I gave illustrations  
 talk on trees — up river.  
 At night in canoe  
 all night, & 2 or 3 inches  
 fell of rain came.  
 It was certainly fine,  
 and freshened everything  
 up.

July 31, 1919

Collected plants near  
 culture, in open border  
 place:  
 + *Cirsium altissimum* brs  
 + *Parthenocissus* br  
 + " " br  
 + *Urtica dioica* fl  
 + *Lactuca*  
 + *Trifolium* fl  
 + *Eriogonum* fl  
 + *Lappula* in can. fr. fl.  
 + *Potentilla canadensis* fl  
 + *Scrophularia maculata* fl  
 + *Prunella vulgaris* fl  
 + *Pogonia* — by Mrs. Pallas  
 in deep woods.

Packed a package of plants  
 & sent it in.

In afternoon took a trip  
with party towards (4 to)  
Lewland Pt. Found  
Canada Thistle in flower  
collected following:  
(See collection).

In the evening we took  
dinner with Mr. &  
Mrs. Palas (she was  
Miss Rehmann)  
in their cottage. They  
live at Elkader &  
he was (was) county  
attorney.

In evening we gave  
illustrated lectures in tent -  
Ray & D.

I packed until 1 am.

Aug. 1 - 1919. Friday  
Cold last night!  
Got up early & went down  
to hotel!

Left at 8:00 am for  
New Albion

The Yellow River valley  
looks fine!

Harpis Ferry is also good.  
The valley which runs  
back shows large bare  
areas on hills on N. side.

Right here, above  
Harpis Ferry, the Wisconsin  
side is timbered & our  
side shows bare faces -  
prairie - on the left.

All the valleys on Iowa  
side (running back)  
show more timber on S.  
& bare slopes on N.

I see *Silphium*  
*laciniatum* in fl  
on base Iowa slopes.  
The last <sup>3 or 4</sup> miles of  
rivers towards Wetmore  
show more timber,  
but where valley  
crosses in N. side in  
base, it is timbered.

Much *Quercus alba*  
along banks at  
base of bluffs.

As timber increases  
on one side, it  
decreases on Wisconsin  
side.

Around the bend  
Iowa side more  
forest, Wisconsin  
side more prairie.

In a good many places  
the tops of hills are  
timbered, & slopes below  
bare. Did forest rise  
up out of valleys beyond,  
or does the steep, rocky  
slope contribute to xerophyte?  
Did not stop at Wetmore.  
The latter part is  
Lanning.

Go up valley at Lanning  
& look to E. & get  
series of bare faces to  
SW. (like Rens)  
(This E. of town.)

Above Lanning the  
Iowa side is well-  
timbered, and the  
Wisconsin side shows  
large bare areas, at  
ends & on SW. faces of ridges  
& slopes.

Many White Pond Lilies  
in ox-bow ponds along  
river.

Reached New Albin  
at 9<sup>50</sup> & went to  
the New Albin House  
(<sup>James</sup> Mrs. Crowley, prop.), - the  
old Hartley House.  
Spent time until noon  
in mending & writing  
notes & letters.

This man Kay is a curious  
chap. I rather imagine  
that he has had it in  
for me since I "dared"  
to criticize Chamberlain  
at the Cedar Falls  
meeting a few years  
ago. Take, for example,  
the meeting of the

Iowa Acad. at which  
Leighton presented his  
paper on the Ever, etc.  
He gave Leighton <sup>as also for discussion,</sup>  
large amount of time,  
but cut me off with not  
sufficient time even  
to present my paper  
fully.

At the last meeting,  
July 31, at the evening  
exercise, he and I went  
to give illustrated exercises.  
He started, and started  
very late, - at 8<sup>38</sup> PM  
He talked 45 minutes, &  
when that was up he  
asked what I should  
do, and I suggested that  
he finish, & he took at least  
10 minutes more. When

came my time Mr  
Bennett was fixing  
his lantern, & I just  
talked to fill in time but  
all this was counted in  
as part of my time.

Then when the time  
(45 min.) was up I  
was not through, & there  
were several requests  
that I go on, but  
Kas, as president, insisted  
that I stop.

It  
was only 10:15 and his  
claim that it was late  
was rather thin, when  
you consider that most  
of the rather small crowd  
lingered for a half  
hour after close of  
program.

After dinner I  
went on hills just  
above New Albin,  
collected on open prairie slopes,  
rocky;

<i>Juniperus communis</i>	fl scattered

Went to ~~hill~~ + only better  
Aug. 2 - 1919. Saturday  
The RR. is on a level  
with gravel terrace at  
Newellville, but drops  
gradually to lower  
bottom. My plants  
are mostly after and  
beginning. It seems  
that pure prairie  
has taken possession

of the low ridge  
formed by material  
from cut. Here and  
there are natural  
surfaces, but along  
RR it is mostly  
either cut or heaped up.

Where <sup>was</sup> gardens =  
a good many feet.  
At New Albin the  
sand & gravel come  
quite to surface  
(people's gardens  
paved early on  
account of drought)  
but farther up  
the upper bank (see)  
there is good soil  
over the sand & gravel.  
Sand & gravel pits, however,  
are everywhere.

Packed & wrote letters, then  
took photos, along RR,  
New Albin

Photos 1-2

Looking N. partly across line  
Albin Lake. I believe a lake  
Photo 15 & 16 - Looking at 1<sup>st</sup> hill  
just a mile W. of N.  
This is where I collected  
plants.

Rock

Top section

Middle section

Basal section

Photos 3, 4 - Down track  
Southwest - along far  
left of track I got  
much of my lower prairie  
stuff

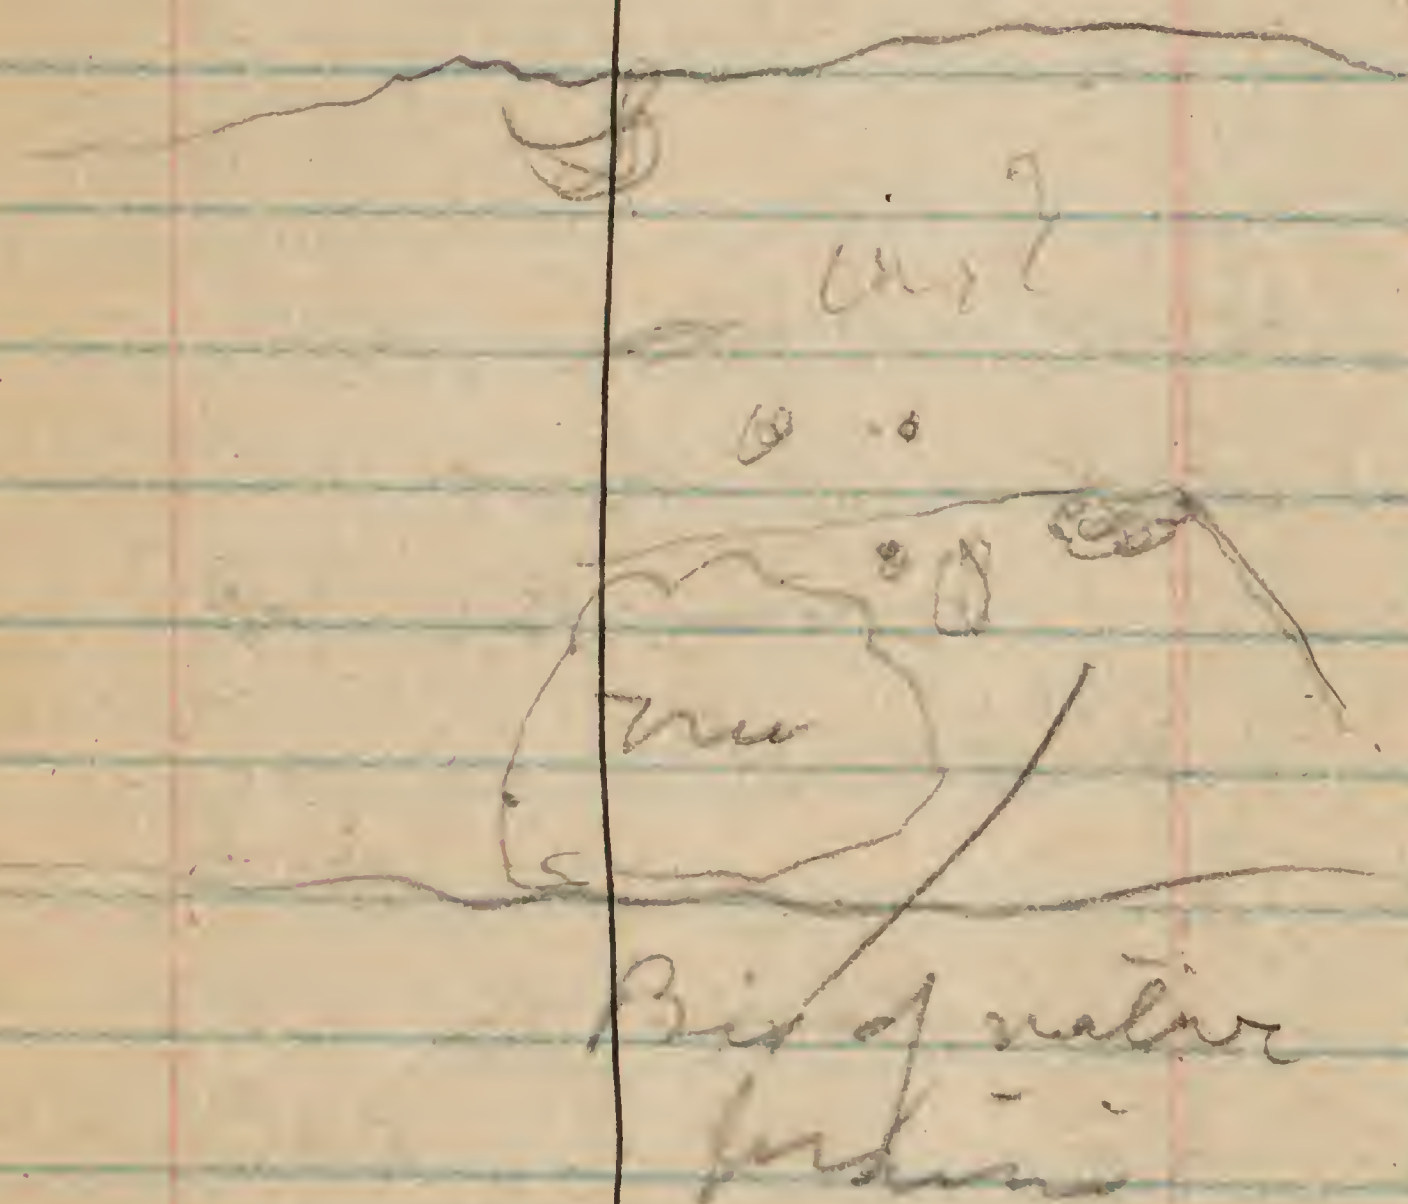

Photos 1/2

1 = 22- $\frac{1}{3}$

2 = 32- $\frac{1}{3}$ - $\frac{1}{2}$

Hill 1 - Looking N.

Photos 2/22

Looking N.E. across

New Allin to the

more remote ridge land

hills - nearly all bare

Returned, rushed  
ate dinner, & took  
train at 12:30 for  
McGregor, Calmar and  
Decorah.

(The section bar at  
New Allin has a war  
garden along the RR  
on that part running  
SW from depot, to curve.  
If you look at this  
from the SW it looks  
brown & rather bare,  
but if you look at  
it in the opposite  
direction it looks  
quite green. It was  
very dry here until  
Wednesday night, &  
effect is shown.)

Right at No. McGregor  
is a good bluff with  
prairie & scattered  
bur oaks, etc. The  
deep valley to N, shows  
others on E. side.

From No. McGregor  
we (C. M. & S. P.) follow  
a rocky creek, at  
first in deep valley  
with limestone cliffs  
high up, then  
growing lower as we go  
up & finally only  
wooded rounded slopes  
before Giard Sta.  
is reached.

Two ledges appear  
along creek - even at  
Giard.

(The bluffs along the  
Miminkhi are so  
rough that there is  
little change in  
prairie & forest. Even  
where latter is cleared  
it is manifest.

The rocks are all  
very rocky, - small &  
larger fragments of  
limestone, every where.

No. of No. McGregor  
To Beulah it is rough,  
with occasional low ledges,  
& well timbered.

Among trees noted,

Prun. sal

Wh. oak

Am. elm

Basswood

Salix amygdaloides (along creek)

Wild Crab.  
Red Cedar  
Iron wood (esp over ledges)  
Horn Maple  
Hickory  
Red Elm  
Box Elder  
Populus tremuloides  
Crataegus mollis

upward

Green Ash.

Cottonwood

Walnut

Wild Plum

We now get out of  
woods beyond

Break. Rolling

open & cultivated

Low layers of rock,

lichen coverd, appear  
near top.

Flora along R.R. is  
good prairie. Recognized:  
Solidago serotina fl  
+ Lycopodium fl  
Euphorbia corollata fl  
Elymus canadensis fl  
+ Lactuca - (like herallii) fl  
Andropogon furcata fl  
+ Monarda mollis fl  
+ Veronica virginica fl  
+ Oenothera biennis fl  
Artemisia lud - fl  
Pycnanthemum flexuosum fl  
Cirsium discolor fl  
+ Verbena hastata fl  
+ Pastinaca sativa fl  
Verbena stricta fl  
Helianthus occidentalis fl  
Ammophila canescens fl  
Solidago rigida fl  
Liatris scariosa fl  
Rudbeckia hirta ab.

- + Helianthus griseus L.  
 + Asclepias syriaca L.  
 Hemlock herb fr  
 Potentilla arguta fr  
 Desmodium canadense fl  
 Ceanothus americanus fr  
 + Chamaenerion leptophyllum (tw)  
 Erigeron annuus fl  
 + Solidago canadensis fr  
 + Cnicus altissimus —  
 Ranunculus abortivus old.

Monona is well up  
where you can look  
over a great plain,  
cut by valleys, the  
characteristic upland.  
Beyond Monona a  
splendid view, -  
evidently prairie  
except where forest  
comes over top.

To Lucretia

Principally R.R.

Can you fix tension line  
 between forest & prairie?  
 No, because no one factor  
 determines.

Evaporation — sun  
 — wind  
 — rel. hum.

Steep slope — drained soil  
 Kind of soil affects water  
 movement.

These are variable &  
 produce effect jointly.

(conover)

C. M. & St. P. RR.  
between Concrete  
Decatur.

Abutilon striosum fl  
my corn field  
Reached Decatur at 5<sup>25</sup>  
put up at Winchester Hotel.

After supper I went on bare hill just opposite & to right of the foot bridge, on N. side of river.

This is now much pastured, but a piece to N. is fenced in with corn & seems to be about normal. It has been very dry until very recently, & this probably adds to the barrenness of the hill.

The rounded hills N. of the city, on N. side of river, show bare bases to S. W. I collected a series of prairie plants, many rather poor, but showing species.

On return met Mr. <sup>E.J.</sup> Hook,  
Mayor, who is interested in the  
Decorah State Park  
movement. He had been  
at McGregor, - and -  
completed, south bound.

Sunday, Aug. 3, 1919

Spent all forenoon  
and early in the  
afternoon at the  
Hotel Winnebago  
expecting Mr. Harlan,  
whom I was expected  
to meet to look over  
Decorah State Park.  
Slept part of afternoon,  
I took a walk later  
in afternoon, but  
altogether accomplished  
very little.

Spent all the time,  
practically, in  
waiting for the  
Harlan, which  
did not come!

Monday Aug 4, 1899  
Went out on Bluffs N.  
of river, from foot bridge  
to Ice Cave.

In open places

*Solidago canadensis* br

*Lactuca ludoviciana* fl

*Cassia chamaecrista* fl

*Gnaphalium polycephalum* br

*Cirsium discolor* br

*Desmodium canadense* fl

*Hypochaeris glabra* (?) fl & fr

*Erigeron canadensis* fl

*Helianthus major* fl

*Desmodium illinoense* fr

*Lepidoglossis capitata* br

*Plantago major*? - fr

*Asclepias verticillata*

*Elymus canadensis* fl

15 *Pycnanthemum flexuosum* fl

*Lactuca pinnatifida* fl

*Veronica basium* fl

18

I went to Ice Cave &  
climbed the bluff.

I then followed the bare  
top, & rise down to  
bridge east.

*Cornus alternifolia* Fr.

Saw 7 bluffs at Ice Cove.

Rev John

Confession

Hand above all

11

June 1st 1881

The slope facing S. &  
a little W. above the  
ree cave is open prairie  
now pastured, but formerly  
appeared:

*Kuhnia capitata* var  
*Cromolaia caryocarpus*  
*Verbena stricta*  
*Euphorbia corollata*  
*Poa compressa* (dwarf)  
Mullen

*Asclepias syriaca*  
*Ambrosia artemisiifolia*  
*Asparagus*

Barbed wire along lower  
edge.

*Portulaca oleraceae*  
*Eragrostis ciliaris*  
*Lithospermum canescens*

The ridge slopes gently  
to east or SE. at top.

Haystack at upper edge

valley

Barbed wire

Barbed wire

Desmodium illinoense fl  
Aster americanus fl  
Vicia americana fl  
Agropyron Richardsonii fl

Returned & took dinner with  
the Commercial Club at hotel.  
Talked in Park.

In afternoon went to  
Power dam 7 mi E.  
Decorah with Mr. Burtis  
(father of Jerome Burtis)  
the chief engineer or  
superintendent. Collected  
plants, and noted  
the list of timber  
plants in next page

Found Cryptogramma on  
limb of ledge on way down.

There is a nearly  
wooded bluff along the  
river.

*Prunus serotina*

*Ostrya virginica*

*Juglans cinerea*

*Quercus alba*

*ellipticalis*

*macrocarpa*

*rubra*

*velutina*

*Juniperus communis*

*virginiana*

*Carya amara*

*Filix americana*

*Corylus americana*

*Carya ovata*

*Zanthoxylum am.*

*Ribes gracile*

*Populus grandidentata*

*Pinus strobus*

*Ampelopsis*

*Physocarpus opulifolius*

*Populus tremuloides*

*Vitis vulpina*

*Ulmus amer.*

*Rhus glabra*

*Fraxinus nigra*

*Viburnum lentago*

*Lonicera Bulliana?*

*Ribes cynosbati*

*Cornus paniculata*

*Ulmus fulva*

*Acer Negundo*

*Juglans nigra*

*Prunus americana*

*virginiana*

*Betula v. papyrifera*

*Ostrya quincunfolia*

*Rubus allegheniensis*

*Salix discolor*

*longifolia*

Went to summer house  
up the river from dam.  
This faces due south.  
They cut trees in front at  
base, & now they have all  
the trees farther back, formerly  
in deep woods, dying.

I suggest box-elder, wild  
plum & possibly willow for  
SW. lower part, a few  
Am. elms in front of  
cottage, & green ash & any  
tree (small) along exposed  
edges, for higher ground.

sent packages of plants  
packed & left at 8:15 PM  
for Postville. Mr.  
Harlan had not turned  
up, and I left after  
2 days waiting.  
Mr. Orr & Prof. Keys

of Millerton were at  
Hotel, & Keys went to  
dam with us.

At Commencement Club  
dinner met Mr. Towhee,  
jeweler, who came from  
Spiller's, & whose wife  
is a cousin of Miss  
McRaith of Pub. Library,  
who grew up in Decorah.

On the slopes above dam  
wherever there was an  
opening, no matter how  
small, prairie plants  
appeared.

Left at 8<sup>15</sup> PM for  
Calmar & Postville.

Notes on way to Calmar:

*Rhus glabra* - old

*Solidago canadensis* bud

*Cirsium discolor* bud

*Silphium perfoliatum* fl

*Aster umbellatus* fl. <sup>very</sup> com

*Silphium laciniatum* fl

*Euphorbia punctata* fl. very com

*Euphorbia corollata* fl

*Antennaria ludoviciana* bud

*Monarda mollis* fl. very com

*Echinocystis alba* <sup>very</sup> com

*Solidago rigida* bud

*Urtica canadensis* fr

*Lactuca ludoviciana* fl

*Desmodium canadense* fr

*Asclepias cornuta* fl

*Baptisia leucophylla* fl

*Andropogon scoparius* fr

along cracks  
success

*Parthenium integrifolium* fl

*Oenothera biennis* fl

*Spartina Michx.* fl. com

*Scirpus atrovirens* fr. "

*Andropogon furcatus* fl

*Helianthus grosseserratus*

*Calamagrostis canadensis* fr. com

*Thalictrum dasycarpum* fr.

*Rumex crispus* fr

It was getting a little  
dark, but I could make

out the above very

clearly as the train

crept up the grade.

Reached Calmar at

about 8<sup>55</sup> PM.

Went to sleep at 10<sup>35</sup> for Postville,

but the train waited at

Calmar until midnight,

and we reached Postville at about

12<sup>45</sup> AM.

went to hotel.

Aug. 5 - Tues. 1919

In morning met Dr. Nevil of Cedar Rapids & the Dr. Schmidt who was in the auto accident a couple of years ago.

Who is the clay (brick) man at Portville? Burt is a brother? or son? of Denmark man.

Got team at Dr. J. Allen's limo, Portville, drove to "old Tomahawk" near Indian fir park on yellow man, went out on E. road & camp.

Back on west side. Notes

Enter woods -  
Small ledge of rock.  
Wodville  
Woods -

From Cedar Rapids to Ada  
there is good prairie all  
along, beyond river, or  
where creek flows.

Ada to Elmina:  
Pieces of very good  
prairie mostly near Ada.  
Again beyond Elmina, -  
just out towards Iowa  
City, there are good  
pieces & also coarse bits.  
The best part is within  
the first mile.  
Then out 3 or 4 miles is fine

This is about 1 mi. before  
reaching Little station.

*Asclepias verticillata* is  
very common this year,  
especially southward on  
this trip. Just in prime!

## To Okoboji.

Aug. 22, 1919 - Friday  
 Left at 9:45 pm. & took  
 train for West Okoboji

Aug. 23, 1919 - Saturday  
 Awakened at 6 am.

The lake <sup>in morning</sup> and borders  
 at Emmetsburg look  
 promising. Saw a  
 large number of small  
 Sagittaria in flower along  
 edges.

The "weeds" are cut all  
 along the Rock Island, and  
 for much of the stretch  
 are simply left lying  
 on the ground.

The RR right of way is  
 cut over (left lying) most  
 of the way to Superior.

A good piece near Superior.

Landed at the  
 Laboratory at 10 A.M.  
 Our train was over an  
 hour late.

The hills N. of Bay  
 are green. The season  
 has been moist - rain  
 coming mostly at night  
 and at good intervals.  
 The forests everywhere  
 also look very fresh  
 and fine.

I changed clothes  
 and went at once to  
 the Lookout & the  
 2<sup>nd</sup> Lookout. Neither  
 has been cut this year  
 and I collected a  
 number of specimens on  
 each.

Took dinner at mess.

Prof's Warr, Kelly, French,  
Wine, Sawyer, Lewis  
mess. Knepper, Ensign

Drs Wylie, Stromsted  
Kuntz, Mrs. Wylie,  
Stromsted, Kuntz, Kelly,  
Dr. & Mrs. Stevens have  
a cotton reater.

Evers is with Campfire  
Girls.

In afternoon went S. along  
canal.

Collected plants along  
sandy beach near N. end of canal,  
and plants in openings E.  
of canal, including Miss  
Ensign's Boxes.

Met Wylie & French at S. end of  
canal. We went into Green  
Slough.

Visited my Verbena  
patch. Found V. stricta  
almost all in fruit, &  
mostly with leaves covered  
with fungus.

V. hastata was still largely  
in flower, but older plants  
were mostly in fruit.  
There was no fungus on them,  
or very little.

The hybrids were in full  
flower & some (most) were  
partly affected by  
fungus.

Took seeds.

We rowed to Little Emma  
Bay, where *P. bidens*, *P. chin*  
is especially fine. Also  
*P. tamnetum*, *Richardsonii*, etc.  
Left boat & cut across  
country. Worked in low

ground N. of the little  
Pony, from Aditya  
Ridella, the  
then under prairie, first  
on E. side of road, then  
W. side along my  
old prairie S. of  
main box.

(Harker has purchased  
this & will build in it.)  
Returned late & worked  
on prairie plants.

Aug. 24, 1919 - Sunday.  
Visited at Rivington  
in morning. Saw Guy,  
who came back from  
France in June.

At 11 o'clock I talked  
at little assembly on  
Education & Research.

(see notes)

Drove out to Cille  
Soo, to my hillside  
box. Prof. Kelly &  
Stephen went.

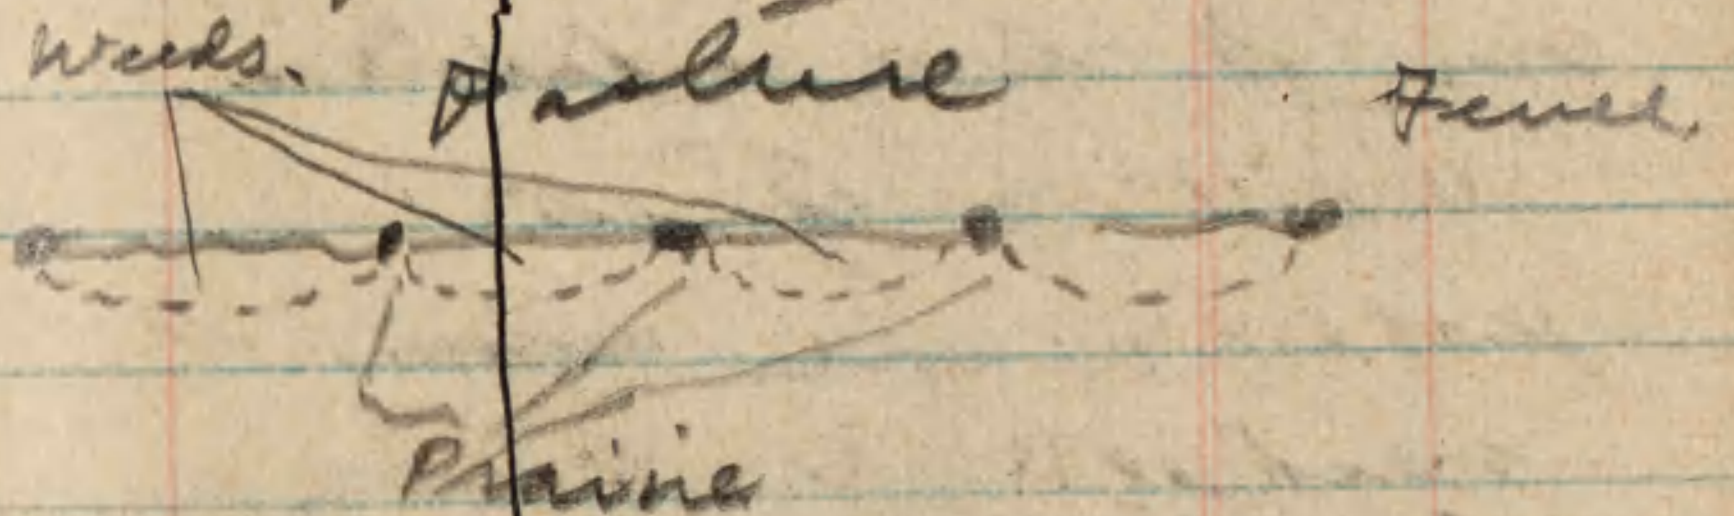

We first visited the  
prairie bluffs N. of road  
on E. side of river, in  
vicinity of kettlehole.

(see specimens)  
Andropogon scoparius is  
especially abundant, but  
low, on the higher slopes, -  
all look rusty brown.

At little hole N. of  
 river bridge.  
 The tops of the bluffs  
 on E. side are covered  
 with old *Stipa spartea*.  
 Prof. Kelly & later Stephens  
 & I noted the sharp  
 line of demarcation  
 between field &  
 prairie, all along the  
 creek E. of these  
 low bluffs. Whenever  
 the ground was broken  
*Setaria viridis* took  
 possession, but it was  
 a few flat *Euphorbia*,  
~~*Setaria*~~ *artemisiifolia* etc.  
 The prairie was absolutely  
 pure where the surface  
 was not broken.  
 In the pasture on N. side of

road & W. of draw  
 at base of these bluffs  
 stock reached through  
 fence, & whenever they  
 could reach & crop  
 the plants weeds  
 appeared.

There were *Setaria viridis*,  
*Amaranthus retrofractus*,  
 flat *Euphorbia*, *Achillea*  
*artemisiifolia*.  
 Under protection of each  
 post prairie remains  
 pure to post.  
 Visited the banks along  
 Big creek & found the  
 same dry & cured up.

Went up to Billings  
Coy. Its top is over  
40 ft. above river.

Found it in fine condition,  
with numerous swamp  
plants (see collection)  
Found white *Colubella*  
*cyphellina* & very pale  
*Veronica stricta* (the  
latter on prairie E of  
bridge.)

Drove to Lab. &

Took supper at  
Dr. Stephens. Stayed  
until 11 P.M.  
Red!

Aug. 25, 1919. Mon.  
Packed plants all  
morning.

Fr. Harker took me  
to Spirit Lake, where  
I mailed two packages  
of plants.

Took train for  
Estherville

Stopped at Gardston Hotel  
Tried to look up OES  
people, poor success.

## Trip to New York

Left Sep. 2 at 1<sup>05</sup> AM  
 Reached Chicago in time  
 To make No. 4 (8.25 AM)  
 on the N.Y. Central.  
 Found no berth or seat.  
 Used coach as far as  
 Cleveland (5.05 PM.)  
 Then got sleeper for N.Y.  
 In the sandy area along  
 S. shore of Lake Erie,  
 Cleveland, there are many  
 patches that are prairie.  
 Patches of Solidago  
 graminifolia, etc. show.  
 Large patches of Danes  
 carota in flower appear.  
 East of Cleveland for  
 many miles the  
 same flat coverd

less sandy surface, with  
patches of grass. Noted:  
*Schizanthus lanceolata* (gram.) fl  
*Brithia cremin* fl  
*Schizanthus nemoralis* fl  
*Erigeron polycephalus* fl  
*Schizanthus canadensis* fl  
*Danthonia carinata* fl  
*Rhus glabra* fr. low bush  
*Asclepias syriaca* lf  
*Apoecynum* — green  
*Erigeron canadensis* fl  
*Ambrosia artemisiifolia* fl  
*Clematis virginiana* fl. Under  
*Erigeron polycephalus* fl  
*Achillea millefolium* fl  
(very rusty looking)  
*Panicum virgatum* fl. — clump  
*Melilotus alba* fl  
*Linum catharticum* fl  
*Convolvulus sepium*

*Lactuca scariola* fr  
*Equisetum arvense* — dense  
Undoubtedly others, but  
train was too fast & I  
could not recognize them.  
There are also many low  
plants with cat tails, &  
much Buckwheat in flower  
to Erie, Pa.

---

Sep. 3, 1919, Wed.  
Reached New York just  
1 hr. late.

Tried to get into McAlpin  
& Martinique Hotels, but  
found both full. Was  
directed to York Hotel,  
cor. of Seventh Ave. &  
36<sup>th</sup> str.

Went to Harmonic Bureau,  
Rev. Korbol's institution,  
at 436 W. 23<sup>rd</sup> str.

Found Mr. Korbol &  
went to Consulate  
with him (154 Nassau  
str.) where I met Mr.  
Kopetsky and Mr. Vencil  
was his right hand man.  
Also Mr. Kulac of Chicago,  
who came to look after the  
Chicago contingent, but

proved an all around  
good worker.

Went with Rev. Korbol  
and Mr. Kulac to the  
Sokol Hall on 71<sup>st</sup> str.  
and had dinner. We  
then went to the  
C. N. S. building, cor. of  
71<sup>st</sup> str. & Second Ave.,  
and had a long  
conference with Mrs. Wotik.  
We had supper in  
Nassau Inn, and  
in the evening I attended  
a meeting of the  
committee arranging  
for reception of soldiers.  
About 205 came  
on the 1<sup>st</sup>, & are mostly  
gone. On the 5<sup>th</sup>  
the Chicago will

Bring in about 4:15.

I listened to the long discussions of details, and then spoke for a few minutes on the coming work of the C. S. N. Rada and the need of unity.

Returned to hotel and went to bed late.

(For notes on Kofsky conference see last pages.)

Sep. 4, 1919 - Thurs  
arrived at 7:30 am., and after the "morning exercises" I went down to 140

Metropolitan Bldg., 140, to meet Mr. Barry C. Smith, Director of the National Investigation Bureau.

Mr. Smith explained that complaints or inquiries come from Kenosha, McKeesport (Pa.) Community War Chest, a place in Conn., & finally covering the Alice Masaryk Fund at St. Paul.

He explained requirements: Certificate of any registered public accountant or trust co. (see letter & blanks for details.)

The "itemized statement"  
does not call for all  
details, — just summaries.

State what for administration

relief

Give budgets.

Do not closely scrutinize  
overhead expenses, — just  
should be reasonable.

Polak's showed that their  
contribution had been publicly  
acknowledged in papers.

Expenses of trip to Siberia,  
etc., are legitimate.

Various organizations,  
including the largest, like  
Red Cross, etc., are registered.

We should be! Easy,  
because now we have no  
more political activity.

Called on Mr. Herbert L.  
Butterson, at the American  
Relief Administration office,  
115 Broadway, and had  
a long conversation  
with him about the  
Hoover work in Czechoslovakia.

Sept. 5, 1919 - Fri.

Spent morning and until 3 P.M. at C. H. A. office, consulting and writing.

After 3 P.M., and all evening I spent with Mr. Capek.

In the afternoon we went to Bronx Park, - he lives near by, on Morningside Court, and wandered about, especially in the Hemlock forest and on Bronx river.

We went to the old Lorillard home.

This part is very picturesque, and is the Capek's favorite.

In the evening we  
spent at his home.  
Mrs. Capek is a daughter  
of Jaroslav Vostovsky, and  
is a very intelligent woman.  
I took some notes on his  
needs and interests, (see  
back of book.)

Returned late  
and did not get to  
bed until after 1 am.

Sept. 6, 1919, Saturday.  
Went up to office  
of C. H. S. on 71<sup>st</sup> St. +  
2<sup>nd</sup> Ave., and we were  
informed that the  
ship would be in at  
3<sup>30</sup>.

After dinner I went  
to Hotel and then  
to pier 84 on 44<sup>th</sup> St.,  
the Freue Co. & we  
waited. The ship came  
in but we could not  
get the boys - there  
were 44 of them, off.  
I went back to Hotel,  
in the evening to the  
Karodn' Drum, where  
there was a disappointed  
crowd.

Sat with the men, &  
returned at midnight.

Sep. 7, 1919 Sunday

Went to pier at  
about 8<sup>30</sup> AM.

One of the men, Jan  
Stodola, 38 yrs, from  
Hopkins, Minn., was  
killed by being thrown  
down the hatch, - 3 decks -  
by a rope carelessly handled.  
The men has been sent  
out of their quarters & were  
crowded on the deck  
where the baggage was  
being hoisted, & the  
sailors were certainly  
careless.

I got aboard the  
ship and saw the men.  
We got away at  
about 10 AM. The

The ambulance had been  
sent for and was <sup>3</sup>/<sub>4</sub>  
of an hour or more in  
coming. Stodola  
still had a breath of  
life, but died very  
soon.

Mr. Shinsky said that  
when he (Stodola) was  
brought into <sup>the</sup> office, that  
the guards, or officers,  
were a great deal more  
concerned about getting  
a priest than a doctor.  
The priest was called  
once, but the ambulance  
came nearly an hour  
after the accident.  
We marched to the  
Harold's Dism.  
In that section of the

city crowds lined the streets.

Some of the men wore their khaki (American) uniforms, and some the pale blue French. They were a sturdy looking lot, though some were 5'3", several 4'8" & many others over 3'5". Some were boyish-looking.

It was very hot and some of the men complained of the long march in their heavy, closely buttoned clothes. We were all hot. The boys sat down to a dinner & enjoyed it. They then registered with Consul Kopecky and

received their R.R. fare and also a gift of \$30<sup>00</sup> each from the C.S. Am. Council.

Mr. Shrisby called them in dining hall to order and I spoke briefly, - then Mr. Kubie, & perhaps others, (I had to go down with the money for the boys.)

I left at about 4 PM, got my R.R. ticket for Pittsburgh, went to hotel, cleaned up, & left at 8<sup>30</sup> PM.

Quite a number of the soldiers were in the train. Soldier Visites with boys awhile and went to sleep.

Sep. 8, 1919 Monday.  
Arose at 7, & landed  
at Pittsburgh at 8<sup>12</sup><sub>45</sub>  
No telegram from Bertha,  
& no baggage. My  
suitcase came on the  
10<sup>20</sup> train, - I got it just  
in time to leave on the same  
train.

Telephoned to Mr.  
Mancini's office,  
(Court 4098 - tel. no) &  
the Slovak League (Court  
4431), but could not  
get him. Nor could  
I get "information" to find  
his Bradlock number.  
Left on 10<sup>20</sup> Am. train  
nearly an hour late.

At Rochester we were  
28 min. late.

Travelled with 4 Slovaks,  
Czechoslovak legionaries.

Two brothers & another one  
from near Milwaukee, & 1  
from Whiting, Ind.

They are nice, like all  
the others, at the officers'  
military & civil, over there.

The trouble is they are  
still mostly old Austrian  
officers, & in both Slovakia

& Bohemia they were kept  
under promise that in  
one year they will learn

the language, - if not, they go.  
In Slovakia they are Madars  
& in Bohemia Germans.

They say that gifts will  
not given to them, - that  
American cigarettes were  
sold in pity (one

yesterday & Czech, said  
that "každá kniha v  
Praze je mltá dřív  
než oni".

These Slovaks want  
to stay here, and those  
who are not citizens  
will become such as  
soon as possible.

They hung 200 Jews  
in Slovak villages, - when  
they were forced to retreat  
the Jews put up the  
red flag & fired on  
them, & they returned  
and hung 200, - 500  
fleeing with the  
Magars.

They related a case  
of an officer (Magar)  
whom they tortured

by lashing daily until  
he became insane. He  
begged them to kill him.  
He had ordered a legionary  
who had fallen into  
Magar hands to be  
tortured, has his eyes  
put out, his nose and  
ears cut off, and both  
his feet to the ankles.

Another young legionary  
who joined the boys in  
France was nailed to  
a wooden cross & flayed  
at head of a locomotive.

They like the people,  
but not the officers.

They say there was  
much profiteering,  
Mr. Kopecky told me  
yesterday that there

were 2307 Czechoslovak  
legionaries who went  
out from this country.  
They are all very glad  
to get home.

They have it in for  
all except Masaryk,  
but they think that  
he is too easy & good-  
natured, and that these  
fellows take advantage  
of him.

They hope for better  
things when the legionaries  
from Russia get home.

They say that American  
legionaries were treated  
well by official claims,  
& that they had no  
chance for anything  
excepting very menial

employment.

They say that quite a  
number were married over  
there, - a few who had  
wives here! They said it  
was because they received  
better care.

One of these Slovak boys  
said that they could have  
tied up the willing boys  
in bundles, and taken  
them away! - They  
were so willing.
